Professional Summary

Highly motivated and results-oriented DSA coder with expertise in developing and deploying full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven ability to design, develop, and maintain robust and scalable web applications. Seeking a challenging role where I can leverage my skills and experience to contribute to the success of a dynamic team.

Professional Experience

Full Stack Developer - Example Company 1

2022-06 to 2023-12

Developed and maintained several key features for a high-traffic web application using the MERN stack.

- Designed and implemented RESTful APIs using Node.js and Express.js.
- Developed and maintained React.js components for a seamless user experience.
- Integrated third-party APIs to enhance application functionality.
- Improved application performance by optimizing database queries and code.
- Collaborated with a team of developers to deliver projects on time and within budget.

React.js Developer - Example Company 2

2021-01 to 2022-05

Contributed to the development of a large-scale React.js application.

- Developed and maintained UI components using React.js and Redux.
- Implemented responsive design principles to ensure compatibility across devices.
- Collaborated with designers and product managers to create user-friendly interfaces.
- Wrote unit and integration tests to ensure code quality.
- Participated in code reviews and provided constructive feedback to team members.

Education

Bachelor of Technology in Computer Science

University Name

2018-07 to 2022-05

GPA: 3.8/4.0

Skills

react nodejs mern

Projects

E-commerce Platform

Developed a full-stack e-commerce platform with features such as user authentication, product catalog, shopping cart, and order management. Utilized MERN stack technologies.

Technologies: React, Node.js, MongoDB, Express.js

Demo: <https://example-ecommerce.com>

GitHub: <https://github.com/dhanushhari150504/ecommerce-platform>

Data Visualization Dashboard

Created a data visualization dashboard using React and a charting library to display real-time data from a simulated API. Demonstrates proficiency in data handling and visualization.

Technologies: React, Node.js, Chart.js
